

Project Summary

Status: Approved and Funded

Lift Station Rehabilitation

Estimated Project Cost (2024 dollars): \$2,326,886

Project History

Each year, the San Jacinto River Authority (SJRA) conducts a thorough evaluation of all 30 lift stations in The Woodlands, including visual inspections and detailed condition assessments, to prioritize rehabilitation needs. Findings from the Sanitary Sewer Transmission Asset Renewal (SSTAR) Program—an in-depth assessment of SJRA’s aging wastewater infrastructure—are also integrated into this prioritized list to address critical maintenance issues and extend the operational lifespan of these vital systems.

Description

This project addresses minor lift station rehabilitations, including structural repairs, electrical upgrades, flood-proofing, and backup power installations.

Project Type

Design and Construction

Current Phase:

Funding Source:
Renewal and Replacement funds

Timeline:
Anticipated completion in Fiscal Year 2025

Actions:

Wastewater Treatment

Wastewater Management
